SUMMARY

For over 13 years I've designed, built and led teams on SaaS, e-commerce and web application products with PHP, Laravel, React and Next.js. I've worked on more than 60 projects, for startups, agencies and enterprise companies.

I work across every stage of a digital product: architecture, backend, frontend, API integrations, performance optimisation and infrastructure. I lead distributed teams of developers and designers, handling hiring, mentoring, delivery and client relationships.

AI is part of my daily workflow. I coordinate multiple agents and models, with automated review and testing cycles that let me build complex, high-quality features faster and at lower cost.

EXPERIENCE

Co-Founder & Technical Director

08/2020 - Present

somoscuatro ↗

- I help CEOs and Product Owners define technology strategies to improve their products' architecture and scalability
- I define end-to-end technical architectures: from data modelling in PostgreSQL to infrastructure with Docker, Terraform and Kubernetes
- I act as the bridge between UI/UX design and engineering teams. I lead distributed, multidisciplinary teams, setting delivery and documentation standards across all the projects we work on
- I design and build complex features for clients' SaaS and e-commerce platforms using Laravel, PHP, Livewire, Inertia.js, Alpine.js, React, Next.js, TypeScript and Tailwind CSS
- I choose, customise and implement bespoke CMS architectures for each client, helping them decide which solution fits best among Statamic, Shopify, Sanity, WordPress/WooCommerce and Craft CMS
- I build looped AI agent systems with Claude Code, Codex and Orca, optimising orchestration flows for the highest code quality per token consumed. I build custom agent chains with LangChain and LangGraph
- I handle prompt engineering and integrate MCP servers and n8n automation flows to connect AI agents with clients' working tools
- I use local models with LM Studio and Ollama for work that requires client data privacy or quick testing without API costs
- I design and implement technical SEO, accessibility and performance improvements on client sites, to increase conversion and organic traffic

Web Developer & Team Lead

08/2020 - 02/2022

EARLY ↗

- I led a team of 4 developers, managing project delivery with Agile/Scrum and coordinating priorities and deadlines with product teams
- I acted as the technical point of contact for the marketing team and the CTO, translating their requirements into technical solutions
- I led the team in integrating Stripe Billing with SSO between the marketing site and the SaaS application, handling the authentication and billing flow between both systems
- I led a full refactor of the marketing site's codebase, introducing an object-oriented architecture, separating business logic from the view layer and adding a test suite
- I monitored performance with New Relic, identified slow queries and other bottlenecks, and resolved them by optimising search with Apache Solr, caching with Redis and gzip compression
- I built WordPress/WooCommerce plugins with an object-oriented architecture in PHP 8 and Gutenberg component-based

themes, with custom editor blocks tailored to the marketing site's needs

Team Management · Stakeholder & Client Management · Agile/Scrum Delivery · Full-Stack Web Development · Performance Optimisation

Web Developer & Team Lead

04/2016 - 08/2020

netzstrategen ↗

- I led a team of 7 people across development and design on enterprise projects, also handling hiring and team growth
- I ran technical training sessions and workshops for the team, and was the direct point of contact for individual feedback
- I was the main point of contact between the team and client stakeholders, from scoping through to delivery
- I managed the delivery of medium and large projects using Agile/Scrum methodology
- I identified bottlenecks and optimised performance on enterprise client websites using nginx cache, Varnish, Redis, AMP and gzip compression
- I developed WordPress/WooCommerce plugins in PHP 7 with an object-oriented architecture and designed component-based themes with Flynt, Twig and Gutenberg, including custom editor blocks
- I maintained and supported third-party WordPress plugins and themes, also contributing to WordPress core, WooCommerce and other open source plugins

Web Developer & Team Lead

09/2012 - 04/2016

wi.iu' upset@

- I led a team of 3 people across development and design, setting priorities and work standards
- I mentored the team through ongoing feedback, and acted as the point of contact for clients and stakeholders
- I managed the delivery of small and medium-sized digital projects, coordinating priorities and deadlines from scoping through to delivery
- I developed websites and bespoke CRM solutions with Laravel, handling both backend logic and integration with clients' systems
- I designed and built bespoke themes and plugins for Shopify, WordPress/WooCommerce and PrestaShop, tailoring each solution to specific client needs

Team Management · Code Review & Mentoring · Stakeholder & Client Management · Full-Stack Web Development

SKILLS

PHP	Statamic
Laravel	Sanity.io
Next.js	Shopify
React	WooCommerce/WordPress
JavaScript/TypeScript	Inertia.js
PostgreSQL / MySQL	Alpine.js
Docker	Tailwind CSS
AI Agent Orchestration	New Relic
AI Multi-Agent Looping Systems	Datadog

EDUCATION

Computer Science Coursework ↗

2010 - 2013

Università degli Studi di Napoli "Federico II" - Facoltà di Informatica

Advanced PHP Programming ↗

2012

ILAS

LANGUAGES

Italiano	Native	English	Fluent
Español	Fluent	Catalan	Basic

VOLUNTEERING

CodeBuddy & Teacher2022 - Present

MigraCode Barcelona ↗

Teaching web development and coaching migrants to help them land their first job in the tech industry as a volunteer instructor and mentor.

CERTIFICATES

Asana Ambassador ↗2025

Asana

Asana credentials for product expertise and active contribution to the Asana user community

Asana Foundations Skill Badge ↗2025

Asana

Asana Academy credential validating foundational proficiency in work management with Asana

Google Analytics Individual Qualification ↗2022

Google

Validated proficiency in advanced Google Analytics concepts for data tracking and reporting
